

Aqua Composite Window Sills

*Just 5 mm thick:
ideal for
renovations!*

Aqua Composite

Window sills

Window sill renovation in no time

Aqua Composite window sills are just 5 mm thick SPC, making them exceptionally suitable for renovation projects. They feature a clean, straight edge finish and are easy to cut to size. The window sills are installed with adhesive and can be professionally finished using matching self-adhesive edge banding.

- ✓ SPC core with vinyl top layer: 100% waterproof
- ✓ Impact and scratch-resistant
- ✓ Slim design (5 mm): ideal for renovations
- ✓ Easy to cut to size

The Aqua Composite window sills integrate seamlessly with the other Aqua Composite products, panels and tiles for floors and walls, thanks to the uniform decors. View the full collection at www.hbcomposite.com.
